Creation

Available for Android version 5+
Developed with Java on Android Studio

USB Tour APP – Team 6

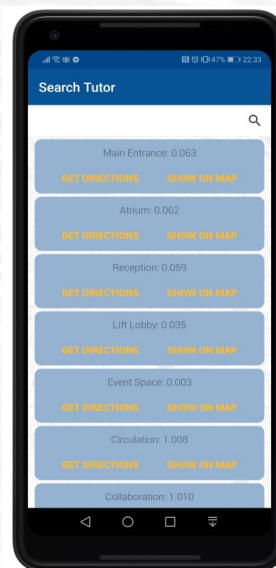

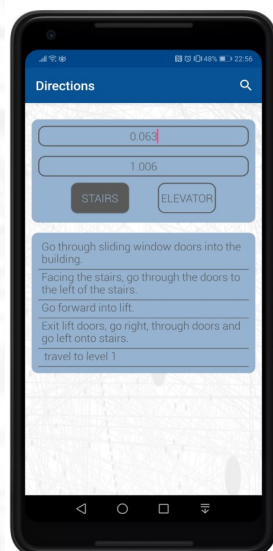

Level page

Shows floor plan, enlarged when clicked, all study spaces available and tutors that have rooms on that floor, more information shown when clicked.

Find a room / Directions

Search available for room finding, location given as well as circled location on floor plan. A step by step route given when required.

Search

Search for tutors or rooms, results given and available to be clicked on for information on that room or tutor. Can then get directions to that room.

Building info

A page for building information will be given including architectural features and history. This will also include event for open days.
